OUR MISSION

*HELP Pregnancy Aid, Inc.
is a non-profit organization
dedicated to providing
life-giving support
and services to
women and families.*

OUR VISION

*Setting our sights on the future,
Our vision is to create a
community of
support that challenges
the status quo in
pregnancy support services
by helping others
overcome obstacles that
challenge life-giving values.*

"The purpose of human life is to serve and to show compassion and the will to help others." – Albert Schweitzer

HELP PREGNANCY AID

We Are Here To Listen To Your Heart.

"There's a lot of difference between
listening and hearing." – G.K.
Chesterton

Risks & Side Effects of Abortion

An abortion, like any medical procedure, comes with risks. The severity and likelihood of the risks are associated with the method, gestational age, and individual health factors.

Associated physical risks of abortion may include:

- Infection
- Heavy bleeding
- An incomplete abortion, requiring another surgical procedure
- Damage to the uterus

Learn more about the abortion procedures through the YouTube video below. Please view with caution, videos contain details that illustrate actual medical procedures.

Abortion Pill Regret Changed Your Mind?

If you've already started the process of taking the pill, it may not be too late. You can be put in touch with a caring medical professional who would like to help.

Confirm Your Pregnancy And Learn About Your Options with an Ultrasound

Ultrasounds are used to confirm your pregnancy and are the next step after receiving a positive pregnancy test. An ultrasound will help us to understand important details about your pregnancy, such as:

Gestational Age:

Knowing how far along you are can help you understand your options.

Pregnancy Viability:

Checking the baby's heartbeat and likelihood of the pregnancy being able to continue to full term.

Ruling out an ectopic pregnancy:

Ensuring the pregnancy is located in the uterus (where it's supposed to be), which is crucial for your health.

How Ultrasounds Work

An ultrasound is a gentle, non-invasive procedure that uses sound waves to create images of your baby growing inside you. These sound waves are perfectly safe and bounce off your baby, sending back images that allow us to see how your baby is developing.

Life's Challenges Offer LIFE Choices

You're not alone. HELP exists as a place where all options can be explored.
